COMPANY PROFILE

Founded on April 25, 2002, **Inception in 2011**, Shivam Medisoft has been a pioneer in healthcare information technology for over 20+ years. We specialize in delivering innovative, reliable, and efficient solutions that empower hospitals to streamline operations, improve efficiency, and enhance patient care. We also work with hospitals audited by **KPMG, EY, PwC and Deloitte**.

WHAT SHIVAM DOES

Implement

We implement the system across the hospital and ensure that everything is connected and working smoothly. Our team visits on-site for setup, integration, and hands-on staff training. The goal is a seamless, hassle-free transition to a fully digitized and efficient hospital environment.

Hospital Health Check-up

Once the system is implemented, you get a unified real-time view of all departments. This allows us to **clearly identify bottlenecks and improvement areas across the hospital**. With everything visible and measurable, we can objectively list what needs to be corrected and optimized.

We Solve

We fix the issues found during the check-up by improving workflows, setting up controls, and training staff. Along with this, our **Make Money, Save Money** approach helps reduce losses and improve financial performance.

MAKE MONEY SAVE MONEY

Over the last few years, while working with clients such as Breach Candy Hospital, Sahyadri Hospitals, along with 900+ hospitals, some of which are audited by EY, PwC and McKinsey, we were successful in developing a solution to address the problem of Hidden Revenue Leakages in hospitals. We call this initiative “Make Money Save Money.

Following are the Case Studies:

MMSM IMPACT CASE STUDY-1 @ 50 BEDS HOSPITAL-HYDERABAD

Total Impact: ₹9.3 Lakh saved / freed in just 20 days

Metric	Day 1 (Before MMSM)	Day 20 (After MMSM)	Improvement
